ABOUT ME

Full Stack Developer specializing in Laravel and React, experienced in building scalable REST APIs and modern responsive web applications. Strong background in backend architecture, database optimization, and clean code practices.

SKILLS

Programming Skills

- **Programming Languages:** PHP, JavaScript, Java, C++, HTML5, CSS
- **Front-end Development:** React, TailwindCSS, Responsive UI Development
- **Back-end Development:** Laravel, RESTful APIs
- **Databases:** MySQL, MongoDB
- **Architecture:** MVC, 3-Tier Architecture, Service & Repository Pattern, SOLID Principles, Clean Code
- **Tools & Platforms:** Git, GitHub, Redis, Stripe, Firebase, Cloudinary, Google Cloud, DigitalOcean

Additional Achievements

- Solved 300+ programming problems on Codeforces: zaid_kr - Codeforces.
- Attended specialized training for DCPC (Damascus Collegiate Programming Contest).
- Attended training for WRO (World Robot Olympiad).

Professional Experience

Full Stack Developer – Aya Internet Service Provider (ISP)
Damascus, Syria | Apr 2026 – Aug 2026

- Developed and maintained full-stack systems supporting the company's internet services.
- Worked on backend development using **PHP Laravel and CodeIgniter**.
- Developed and maintained web interfaces and internal administrative dashboards.
- Worked with **MySQL databases**, writing and optimizing SQL queries.
- Debugged and improved legacy code while maintaining compatibility with existing production systems.
- Used **Git and GitLab** for version control and collaboration within the development workflow.

Teaching Assistant – Damascus University
Faculty of Informatics | Oct 2025 – Present

- Assist in teaching programming courses and supporting students during lab sessions by debugging code and explaining core programming concepts.

- Teach and reinforce **Java**, Object-Oriented Programming (OOP), algorithms, clean code principles, and software development best practices.

EDUCATION AND TRAINING

- Bachelor of Science in Software Engineering University of Damascus, Damascus, Syria
- **Training** – BeeDelivery Private Joint Stock Company
  August 14, 2024 – December 5, 2024
    - Completed a 4-month intensive training program focused on backend and web development with Laravel, RESTful APIs , JavaScript & jQuery ,MySQL

PROJECTS

Athar – Community & Complaint Management System(API)

- **Technologies:** Laravel,MySQL,Spatie,RBAC,Stripe,Cloudinary,Google Cloud,Google Maps
- Built a scalable complaint management platform supporting role-based access (admin, client, provider) and dynamic priority scoring for complaint resolution.
- Enhanced performance with database indexing, caching, and scalable architecture.
- **GitHub:** Athar

Search Engine Project(Full Stack+ML)

- **Technologies:** Python, FastAPI, React, MongoDB, BERT, Scikit-learn
- Built a complete search engine with FastAPI backend and React frontend.
- **GitHub:** Search-engine

File Management System(Full Stack)

- **Technologies:** Laravel, MySQL, Blade, Bootstrap
- Developed a secure file-sharing platform with version control and access management.
- Implemented check-in/check-out locking to prevent edit conflicts.
  GitHub: File-management

Social Media Blog Platform(Full Stack)

- **Technologies:** Laravel, MySQL, Blade, Redis, Two-Factor Authentication
- Built a full social media blogging platform using service/repository architecture.
- Added friend tagging, nested comments, caching with Redis, and admin analytics.
  GitHub: Post-blog
